Summary

Graduate of **Software Engineering** and a **Laravel & Vue.js** developer with over **4 years** of experience in web application development, system integration, and custom ERP solutions. Skilled in designing and implementing interactive user interfaces using Blade and Vue.js, in addition to building robust APIs that support system integration.

Currently seeking a new opportunity to advance my career within a professional technical team that contributes to developing my skills and me to make a meaningful impact on ERP projects and business systems.

Work Experience

Laravel + Vue.js Developer –(CamelCase Company) - ERP

August 2023 – Present

- Developed a comprehensive ERP system with UI development and API integration.

Back-End Developer – Freelance

May 2023 – July 2023

- Built custom web solutions and admin dashboards.

Back-End Developer – Startup Company

October 2022 – April 2023

- Developed web applications and optimized databases.

Projects & Achievements (ERP modules)

• **Manufacturing System (MFP)**

Managing production orders, raw material consumption, labor hours tracking, supporting technical and assembly data entry screens, label printing, and stock request & movement management within the production line.

• **Product Catalog System (Catalog)**

Modified the product storage process with integration across multiple modules and added automatic code generation. Developed a Map page to add products to stores and easily adjust minimum and maximum quantities. Created a screen for easy and direct product price review and updates.

• **LC Shipments Management (LC)**

Handling supplier shipments according to Incoterms, linking containers with purchase orders, shipment tracking, receipt recording, and managing expenses and currency conversions.

- **Sales Representatives Management (SRM)**
Setting commission plans based on sales or products, automatic commission calculation, and generating sales rep performance reports.
- **Stock Counting System (STC)**
Conducting periodic warehouse inventories, monitoring product quantities, linking results to financial reports, and analyzing discrepancies.
- **Leave & Attendance Management (LMS)**
Managing various leave types, leave encashment requests, delay registrations, leave extensions, and time adjustments per company policy.
- **Offers and Promotions (OAP)**
Creating discounts and offers based on purchase quantities or products, supporting multiple offer types, marketing campaign linkage, and sales impact reporting.
- **Customer Relationship Management (CRM)**
Developing features for editing annual client targets and managing client master data to enable precise performance tracking and analysis.
- **Observation / Violation Report (OVR)**
Recording violation notes with witness statements and evidence attachments, tracking report status and actions, and designing a user-friendly interface.
- **Purchases Evaluation (Peval)**
Analyzing and evaluating supplier performance based on product quality, delivery times, prices, and contract compliance to improve purchasing decisions.

Developed and maintained multiple analytical reports covering inventory, sales, purchases, expenses, and purchase orders.

Personal Project

- **The Oxford Project** [!\[\]\(31b03e46ee8a80a1f1467b8c03bd76e8_img.jpg\)](#)
Created an online exam platform with student monitoring as Full Stack Developer.
- **E-commerce Website (Vue.js + Axios)** [!\[\]\(7d9665ff04f9d2270c38081c6215a724_img.jpg\)](#)
Developed real-time frontend linked with Fake Store API.
- **Charitable Organization Management (Laravel)** [!\[\]\(7cea648fec4dfc1e99934873e9173b69_img.jpg\)](#)
System for managing operations of needy and donors.
- **Online E-commerce (Laravel + Blade)** [!\[\]\(48ceb66414885cacc3f139b4fa359213_img.jpg\)](#)
Developed website and dashboard page.
- **Social Media App API (Laravel)** [!\[\]\(01a1fc700f38e6e09ee62e6a9c54d804_img.jpg\)](#)
Backend API for social media app.
- **Reservation Website (Laravel)** [!\[\]\(833c1865792a2399365d8193854ceab7_img.jpg\)](#)
Booking and reservation system.
- **News & Articles Platform (Vue.js + Axios)** [!\[\]\(5b4802b5ab32e2afe0a3214e088c55e2_img.jpg\)](#)
Designed UI for publishing news and articles.
- **Fruit & Vegetable Storefront (Vue.js)** [!\[\]\(c1a72aaa635814897c20812b2e4c560c_img.jpg\)](#)
Designed frontend storefront.

Certifications & Courses

- *Laravel Advanced Training – Self-paced learning via YouTube tutorials and practice*
 - *Vue.js Fundamentals – Self-learned through YouTube educational channels and applied projects*
-

Languages

- *Arabic — Native*
 - *English — Good proficiency*
-

Education

*University of Damascus
Faculty of Informatics Engineering
2018 – 2023
Major: Software Engineering*

Technical Skills

- *Laravel, Vue.js, PHP*
- *MySQL, RESTful APIs*
- *Git, Docker, Agile Methodologies*
- *Blade, JavaScript, HTML/CSS*
